Professional Summary

Full-stack Laravel Developer with 2+ years of experience building scalable web applications for both product-based and service-based companies. Skilled in backend development, modern frontend tools, and delivering end-to-end solutions. Experienced in collaborating with cross-functional and international teams, optimizing system performance, and implementing secure, reliable features.

Technical Skills

Backend Development: Laravel, Symfony, OpenCart, PHP
ORM/Database Abstraction: Eloquent ORM, Doctrine (Symfony)
Frontend Development: Blade, Livewire, Vue.js, Next.js (Intermediate)
Databases: MySQL, SQL
DevOps & Tools: Docker, Redis, CI/CD (Intermediate)
Deployment & Hosting: VPS Servers, cPanel
Version Control: Git, GitLab
Soft Skills: Effective Communication, Team Collaboration, Adaptability, Time Management, Problem-Solving Mindset, Positive & Professional Work Attitude

Experience

Software Engineer, AlphaSoft360 March 2025 – Present

AlphaSoft360 is a product-based technology company focused on building scalable enterprise solutions for global clients.

- Integrated **Braintree Payments** (PayPal, Google Pay, Apple Pay, Venmo) and added support for capturing amounts beyond the initial authorization.
- Integrated **Zebra Printer API** to generate and print labels based on EPC or license plate values.
- Migrated large datasets from a legacy database to a new schema by creating optimized database views and using **Symfony CLI tools**.
- Developed **REST APIs in Symfony** and consumed them in **Next.js** applications.
- Collaborated closely with **international development teams**, ensuring timely task delivery.
- Customized and enhanced **eCommerce platforms** (**Laravel** & **OpenCart**), integrating **Stripe** and **PayPal** payment gateways.
- Automated deployments with **GitLab CI/CD** pipelines, enforcing code quality and testing standards.
- Provided **technical guidance and training** to junior team members to improve their productivity and skill set.

Full Stack Developer, HiddenLogics (Part-Time) Feb 2024 – Present

HiddenLogics is a service-based software company delivering custom solutions, SaaS platforms, and enterprise applications.

- Built complete projects from scratch using **Laravel Livewire** and **Blade**, ensuring clean architecture and modular development.
- Delivered end-to-end solutions, including backend APIs, admin dashboards, and frontend interfaces.
- Developed fully functional admin dashboard structures with role-based access and analytics.
- Implemented full payment workflows using **Stripe** and **PayPal**.
- Deployed projects on **cPanel** and **VPS** servers, and configured **DevOps** setups including WebSockets and related services.
- Implemented **Jobs, Queues, Events, Listeners** and real-time chat features using **Laravel Reverb**.
- Developed authentication flows including **Google Authentication** and local login systems.
- Integrated **Google Calendar** and **Microsoft Calendar**, including **Google Console** configuration.
- Performed extensive debugging, troubleshooting, and bug fixes across projects.
- Managed client communication, handled requirements, and presented completed modules directly to clients.

Projects

Dhobbee — SaaS Laundry Management System (In Progress)

- Building a **multi-tenant SaaS platform** to manage laundry operations, customers, orders, and billing.
- Designing **scalable REST APIs** and implementing **role-based access control**.
- Developing a modern frontend using **Vue.js** integrated with a **Laravel backend**.
- Source code available upon request (**private repository**: https://github.com/MaroofSultan17/dhobee).

CountLinks — Publisher & Advertiser Link Marketplace (In Progress)

- Developing a **two-sided marketplace platform** where publishers list websites and advertisers purchase backlink placements.
- Implemented **real-time chat, notifications, and interactions** using **Laravel Livewire**.
- Integrated **Stripe payment workflows** to manage advertiser payments and publisher earnings.
- Automated background tasks using **custom Artisan commands**.
- Source code available upon request (**private repository**: https://github.com/MaroofSultan17/countlinks).

Gempacked — Enterprise eCommerce Platform
Symfony, Next.js, Braintree, Stripe

- Working on a **large-scale enterprise eCommerce platform** handling high-volume transactions and complex fulfillment flows.
- Enhanced **payment processing systems** using **Braintree and Stripe**, including multi-method and partial capture scenarios.
- Developed and optimized **backend APIs and services** in **Symfony**.
- Supported **CI/CD-based deployments** and production maintenance.
- Live project: https://www.gempacked.com.

RoundHere — Location-based Scheduling Platform
Laravel, MySQL, Google APIs

- Contributed to a **location-based scheduling platform** for managing appointments and availability.
- Optimized **database queries** and backend logic to improve performance and reliability.
- Integrated **Google Authentication** and **Google Calendar synchronization**.
- Live project: https://roundhere.io.

Education

BS Computer Science, COMSATS University Islamabad Sep 2021 – Sep 2025
CGPA: 3.80/4.00
